RISK CLASSIFICATION

The Starting Point

The law classifies AI systems according to their level of risk (unacceptable, high, limited, or minimal). Correctly identifying which category your system falls into is essential to determine the legal obligations you must comply with.

ASSESSMENT AND DOCUMENTATION

The Basis of Compliance
SMEs must conduct an internal audit to identify AI systems in use, assess their impact, and prepare the required technical documentation, especially if dealing with high-risk systems.

TRANSPARENCY AND HUMAN OVERSIGHT

Even limited risk systems must comply with transparency requirements, such as informing the user they are interacting with an AI and ensuring the possibility of human intervention.

SUPPORT AND TOOLS FOR SMES

The law provides specific support measures, such as simplified templates, free training, and priority access to regulated testing environments (sandboxes), facilitating compliance without hindering innovation.
