ESSENTIAL INSTRUMENT TO MITIGATE MARKET VOLATILITY

Price revision clauses allow the adjustment of contractual amounts in the face of significant variations in the costs of raw materials, energy, or key components, protecting both contractors and public entities against the instability of the energy market.

SPECIFIC EXCEPTIONS FOR ENERGY CONTRACTS

Unlike other sectors, energy supply contracts do not require one year of execution or 20% of the executed amount to apply the revision, reflecting the sector's high sensitivity to price changes.

STRICT TECHNICAL AND ECONOMIC REQUIREMENTS

To apply these clauses, it is necessary to technically justify the significant participation of inputs subject to revision (more than 20% of the budget), identify their official indices, and define clear formulas in the contractual terms.
