AI LITERACY AS A NEW BASIC SKILL

Education must go beyond traditional digital literacy and include fundamental knowledge about how artificial intelligence works, its applications, limitations, and ethical risks.

DEVELOPMENT OF IRREPLACEABLE HUMAN SKILLS

In an environment where machines automate technical tasks, education must focus on enhancing skills such as critical thinking, creativity, empathy, and adaptability.

TRANSFORMATION OF THE TEACHING ROLE AND PERSONALIZED LEARNING

AI makes it possible to adapt content and learning pace to each student, while teachers take on a more strategic role as learning guides, supporting the student's holistic development.

REDUCING GAPS AND TRAINING FOR DIGITAL CITIZENSHIP

Education must ensure equitable access to technology and train citizens who are able to understand, question, and actively participate in a society mediated by algorithms.
